

Substainability, at a glance

Our work for a sustainable development

Substainability and responsibility

We have a responsibility that goes beyond providing top quality components to finished products that improves people's physical and mental health within Life Science, improve food production, or as a part of the green transition.

In partnership with the customer, we take a long-term financial, social, and environmental responsibility, how our business affect the society – we work with multiple bottom lines.

Protecting our environment

CO2 emission, objective:
Net-Zero in 2030 for Scope 1 & 2

We install solar panels in 2023

Biodiversity

Our site is a part of a movement called 'Vild med vilje' (Wild on purpose)

Water consumption

We are investigating how we reduce our water consumption

Cultivating the team

Decent work

Share of the workforce that are marginalized persons, 18 %

Quality education

Training of apprentices and trainees makes up 14% of the workforce

Health, safety and well-being

Zero accidents in 2022

Adding value & Governance

UN Global Compact

Koatek is a part of the worlds largest voluntary initiative for responsible companies

Science Based Targets

Koatek has applied for membership

Audit of suppliers

We will expand our quality audit of critical suppliers to include ESG
